Acting Chief, [REDACTED]

Proposed Register of International Organizations

REF : 18 March request re subject from RQM/OIS

25X1A9A

1. On Wednesday, 7 September, I met with Messrs. [REDACTED] in RQM/OIS to report what action has been taken regarding the subject register and to determine if their interest in it had changed since their 18 March request.

2. In response to queries pertaining to their present interest in the proposed register, they informed me that their interest had not changed except that it had grown stronger.

3. I explained to them that since their request had been received that the various problems relating to implementation had been studied and that a working organizational plan had been formulated. I then told them that even though OCR favored the new register that it appeared, at least at this time, that we would not be able to get the necessary slots to do the job.

4. [REDACTED] regretted that such appeared to be the case and immediately ask if it would be possible for us to undertake initially the new function for [REDACTED] international organizations of priority interest (this possibility was posed in the initial request of 18 March) as opposed to setting up an organization to cover the entire field. I said that we would explore this possibility immediately and would do our best to assume this lesser responsibility.

5. [REDACTED] then requested that we inform them by memorandum as soon as possible as to what OCR could and could not do.
